MAIN FEATURES

- In April 1978 there were 208 industrial disputes involving 110,000 employees and resulting in a loss of 227,500 working days.
- The largest disputes involved meatworkers and waterside workers in all States and the Northern Territory; metal trades employees in three States and printing employees in New South Wales.

EXPLANATORY NOTES

More detailed information about disputes appears in the quarterly bulletin *Industrial Disputes* (6322.0).

2. The statistics of industrial disputes are compiled according to the Australian Standard Industrial Classification (ASIC), described in the Bureau publication *Australian Standard Industrial Classification (Preliminary Edition)*, 1969, Vol. 1.

3. The statistics refer only to disputes involving stoppages of work of ten man-days or more. Workers involved include workers directly and indirectly involved in disputes. Workers indirectly involved are those thrown

out of work at the establishments where the stoppages occurred, but who are not themselves parties to the dispute. Particulars of some stoppages (e.g. those involving a large number of establishments) may have been estimated and the statistics therefore should be regarded as giving a broad measure of the extent of stoppages of work (as defined).

4. Stoppages of work occurring at different times and at different establishments, but having a common cause may be regarded as one industrial dispute. However, an industrial dispute occurring in more than one State is counted as a separate dispute in each State. Disputes not settled at the end of a year are included as new disputes in the figures for the following year. The monthly statistics refer to all disputes operative in the month, including those disputes that commenced in previous months. In Table 1 details of the number of disputes and workers involved are shown separately for disputes beginning in the month and for all disputes. Average days lost per worker involved on a monthly basis are not comparable with the yearly averages, because workers involved are included in each month in which they are involved in disputes, while they are counted once only for each dispute in the annual figures. Any discrepancies between totals and sums of components are due to rounding.

(a) Refers to all disputes operative and workers involved in the period - see paragraph 4, above. (b) Monthly figures are not comparable with yearly figures - see paragraph 4, above. (c) Details relating to Victorian workers stood down as a result of the electricity dispute in that State (but at establishments other than those at which the stoppage occurred) have been excluded from these tables. It is estimated that about 150,000 such workers were stood down and that they lost about 2.1 million working days. (d) Subject to revision.
